

# LAB-243

## Hedef

Router'larda eBGP konfigurasyonu yaparak farklı Autonomous System'lerden prefix anonsları yapmak.

## Çalışma-01

Şekilde de görüldüğü gibi R-01 ve R-02 iki farklı Autonomous System'de bulunmaktadır. Her Autonomous System içerisinde farklı IP blokları IANA üzerinden bu AS'lere atanmıştır.

AS-31192'de bulunan R-01, AS-9121'de bulunan R-11'e sahip olduğu 3 adet /24'lük IP bloklarını anons ederken, AS-45783'de bulunan R-02 ise, AS-9121'de bulunan R-11'e sahip olduğu 3 adet /24'lük IP bloklarını anons edektir. AS-9121'de bulunan R-11 ise diğer iki router'a sadece bir adet **default route** (0.0.0.0) anons edektir. R-11 üzerinde gerekli konfigurasyon çalışmaları yapılmıştır.

Sırasıyla router'larda eBGP komşuluk konfigurasyonlarını gerçekleştirelim.

```
R-01#configure terminal
R-01(config)#
R-01(config)#router bgp 38192
R-01(config-router)#
R-01(config-router)#neighbor 212.58.95.2 remote-as 9121
R-01(config-router)#
%BGP-5-ADJCHANGE: neighbor 212.58.95.2 Up
R-01(config-router)#end
R-01#

R-02#configure terminal
R-02(config)#
R-02(config)#router bgp 45783
R-02(config-router)#
R-02(config-router)#neighbor 88.26.30.2 remote-as 9121
R-02(config-router)#
%BGP-5-ADJCHANGE: neighbor 88.26.30.2 Up
R-02(config-router)#end
R-02#
```

```
R-01#show ip bgp neighbors
```

R-02#

Çıktılardan da görüldüğü üzere Routerlar R-11 ile eBGP komşuluğu kurmuş ve R-11 den **default route** anonsunu almaktadır. Şimdi sıra geldi R-01 ve R-02'nin R-11'e doğru anons geçmesine.

BGP'de bir prefix'in anons edilmesi IGP uygulamalarından çok farklıdır. Her nekadar bu işi yaparken kullanacağımız komut aynı gibi gözüksé de ilgili komut (**network**) BGP'de çok farklı anımlara ve işleyişe sahiptir. BGP bizden en temelde bir şeyi istemektedir: network komutu ile anons edilecek prefix'in routing tablosunda **aynen** yer alması gerekmektedir. Aynen derken? Yani mesela 192.168.1.0/28 networkünün BGP ile anons edilmesini istiyorsunuz, mutlak suretle routing tablosunda 192.168.1.0/**28** kaydının bulunması şarttır. Tablonuzda 192.168.1.0/24 için kayıt olabilir ama bu noktada işimize yaramayacaktır. Neyi ne şekilde anons etmek istiyorsak o bilgi aynen ve aynen routing tablosunda yer almalıdır. Evet 192.168.1.0/24 ün olması bir anlam ifade etmeyeceğinden mutlaka 192.168.1.0/28 için bir route kaydını tablomuza koymak zorundayız.

Bizim örneğimize bakacak olursak R-01 102.18.10.0/24, 102.18.20.0/24, 102.18.30.0/24 networklerine directly connected olmadığı gibi routing tablosunda da bu networklere dair bir bilgiye sahip değildir. Bu durumda BGP konfigürasyonun altına gidip network komutu ile bu blokların anons edilme emrini versek dahi bu istediğimiz geçersiz kalacaktır. Peki ne yapabiliriz? Sorun routing tablosunda bilginin olmaması değil mi? Öyleyse bizde routing tablosuna bu bilgiyi ekleriz. Statik route ile tabiki. Tabiki ama bu statik route'u nereye doğru yazacaz? Cevap bitmez tükenmez, sonu gelmez bir kara delik olan **Null 0 interface'ine** doğru. Böylelikle Günün sonunda router'ı kandırıp ihtiyaç duyduğu satırı routing tablosuna eklemiş olacağız.

```
R-01#configure terminal
R-01(config)#
R-01(config)#ip route 102.18.10.0 255.255.255.0 null 0
R-01(config)#ip route 102.18.20.0 255.255.255.0 null 0
R-01(config)#ip route 102.18.30.0 255.255.255.0 null 0
R-01(config)#
R-01(config)#end

R-02#
```

Artık ihtiyaç duyulan routing bilgisini ihtiyaç duydukları şekilde routing tablolarına koyduğumuz router'lar üzerinden anons işlemine başlayabiliriz.

R-01#**configure terminal**

```
R-01(config)#
R-01(config)#router bgp 38192
R-01(config-router)#
R-01(config-router)#network 102.18.10.0 mask 255.255.255.0
R-01(config-router)#network 102.18.20.0 mask 255.255.255.0
R-01(config-router)#network 102.18.30.0 mask 255.255.255.0
R-01(config-router)#end
R-01#
```

R-02#**configure terminal**

```
R-02(config)#
R-02(config)#router bgp 45783
R-02(config-router)#
R-02(config-router)#network 72.23.1.0 mask 255.255.255.0
R-02(config-router)#network 72.23.2.0 mask 255.255.255.0
R-02(config-router)#network 72.23.3.0 mask 255.255.255.0
R-02(config-router)#end
R-02#
```

Bu noktadan sonra router'ların BGP ve IP Routing tablolarına bakarak anonsların gerçekleşmiş olduğunu görebiliriz.

R-01#**show ip bgp**

```
